

# Final Year Project Proposal

## Department of Computer Science ABDUL WALI KHAN UNIVERSITY MARDAN GARDEN CAMPUS

### 1. Project Title:

**TaskFlow:** Design and implementation of a smart personal Task management system

### 2. Student(s) Information

- **Name of Student:** Farhan Khan  
**Registration No:** awkum-22147646  
**Email:** farhankhan44a@gmail.com  
**Contact No:** 03159256765
- **Name of Student:** Kamran Khan  
**Registration No:** awkum-22157075  
**Email:** kamrran77@gmail.com  
**Contact No:** 03132829120
- **Name of Student:** Muneeb diyar khan  
**Registration No:** awkum- 22147942  
**Email:** muneeb420@gmail.com  
**Contact No:** 03459720762

### 3. Supervisor Information

**Name:** Dr. Rahim khan  
**Designation:** Professor  
**Email:** rahimkhan@awkum.edu.pk

### 4. Project Domain / Area:

- ☐ Artificial Intelligence
- ☐ Machine Learning / Deep Learning
- ☐ Data Science / Big Data
- ☒ Web / Mobile Application Development
- ☐ Cloud Computing

- ☐ Cyber security
- ☐ Computer Vision / Image Processing
- ☐ Natural Language Processing
- ☐ Internet of Things (IoT)
- ☐ Software Engineering / Information Systems
- ☐ Others: \_\_\_\_\_

## 5. Problem Statement:

The core problem is the absence of the acentralized, intuitive personal task management system. Existing solutions are often either too simplistic or users lack visual productivity. This results in a lack of motivation due to no visual progress tracking. (((project proposes the design and development of the web based “intelligent Personal productitvity dashboard”.

## 6. Objectives:

- To analyze the limitations of the existing task management tools and identify key user requirements.
- To design a user friendly interface where user achieve their desire goal easily.
- To upload and summarize their work with in system.

## 7. Scope of the Project

### Included:

- Login / Signup page
- CRUD(Create, Read, Update, Delete)
- Marking tasks as completed or incompleted.
- Responsive web design

### Excluded:

- Mobile app development
- Real time collaboration features(e.g. shared task list)
- Advanced AI based task suggestions.

## 8. Proposed Solution / Methodology

- **Frontend:** Figma, HTML5, CSS3, JavaScript, react/bootstrap.
- **Backend:** Node.js, Express.js
- **Techniques:** Agile development methadology

## 9. Expected Outcomes

- A fully funtional secure and deployedweb application for personal task management.

- User friendly Interface where user achieve their goals.
- A scalable in future we can add AI system.

## 10. Timeline (Gantt Chart / Milestones):

| Phase   | Task                   | Duration | Expected Completion                 |
|---------|------------------------|----------|-------------------------------------|
| Phase 1 | Requirement Analysis   | 2 week   | 29 September 2025 – 12 October 2025 |
| Phase 2 | Design                 | 4 weeks  | 13 October 2025 – 09 November 2025  |
| Phase 3 | Front-end development  | 8 weeks  | 10 November 2025 – 28 December 2025 |
| Phase 4 | Back-end development   | 18 weeks | 29 December 2025 – 03 April 2026    |
| Phase 5 | Testing and deployment | 3 weeks  | 04 April 2026 – 24 May 2026         |
| Phase 6 | Final documentation    | 2 weeks  | 25 May 2026 – 07 June 2026          |

## 11. Resources Required:

**Software:** VS code, Node.js. mongoDB/Firebase, Github, .

## 12. Risk Factors & Limitations:

### Risk Factor:

- May cause time issue due to learn the skill then implement.
- Insuffecient back-end knowledge.
- Database design errors.
- Resources risks.

### Limitations:

- The system is desing for individual use and does not support team collaboration.
- Collaboration with other sites may be not support.

- No monetization features.

### **13. References:**

- MDN web docs
- Express.js
- Chatgpt
- YouTube
- Deepseek

### **Student Declaration:**

We hereby declare that the above proposal is original and has not been copied from any other source.

**Student(s) Signature:** \_\_\_\_\_

**Supervisor's Signature:** \_\_\_\_\_
